As Reported By: 

You've built a website but just because it's there doesn't mean anyone will visit. The key to any successful online campaign is your search engine rankings - how high up the list does your website appear when a potential RV buyer performs a SEARCH? If you are in the top three spots you are guaranteed to be visited.

It takes time, effort and a whole lot of "know-how" to get to the top of the list in any Search Engine and that's exactly what we here at RVHotline have. If your units aren't being seen on your own website why not partner with us and use our rankings to reach your audience.

Take a look at the list below and our results will speak for themselves. The left-hand column lists the terms people use when doing a search on Google for RVs. The right-hand column shows the position in the list where RVHotline first appears.

(Keep in mind that these rankings change from time to time so from one day to the next the rankings may change somewhat but at 4pm on November 4th, 2009 this is the official ranking report directly from Google Canada).
