OPTIONS & EQUIPMENT

- **Heated and Enclosed Holding Tanks:** Warm air from the furnace is ducted directly into the enclosed tank area to prevent freezing.
- **Thick-Wall & Roof Insulation:** Features a welded aluminum frame high-density block-foam insulation and arched-roof construction (typically 5 to 5.5 inches).
- **Thermal-Pane Windows:** Optional or standard frameless thermal-pane windows significantly cut down on heat loss and interior condensation compared to single-pane glass.
- **Heavy-Duty Construction:** Built for rugged use and off-grid/boondocking capability rather than lightweight ultra-thin framing.
